Work made. Work next_

Graphic design for Kenyan small businesses, startups and creators.

Ryan Otieno, Founder & Graphic Designer

otienoryan786-lab.github.io/Max_imum-Designs

01 ABOUT

Who we are

Max_imum Designs is a graphic design studio in Nairobi. We give small businesses, startups and creators a clear, confident brand without agency prices or freelancer guesswork.

The studio is led by Ryan Otieno, a designer and full-stack software engineering student at Moringa School, so the work is made to function on real phones, websites and print.

Every project shown here is for our own brand or a concept project. Client work is added, with permission, as it is completed.

WHAT WE DESIGN

Logos and brand identity · Print and stationery · Social media · Documents and decks · Motion · Web

8 more projects planned

COMPLETED

OWN BRAND · OCTOBER 2026

Max_imum Designs brand identity

The studio's own identity: a tile, an M and an underscore that works like a designer's cursor.

THE CHALLENGE

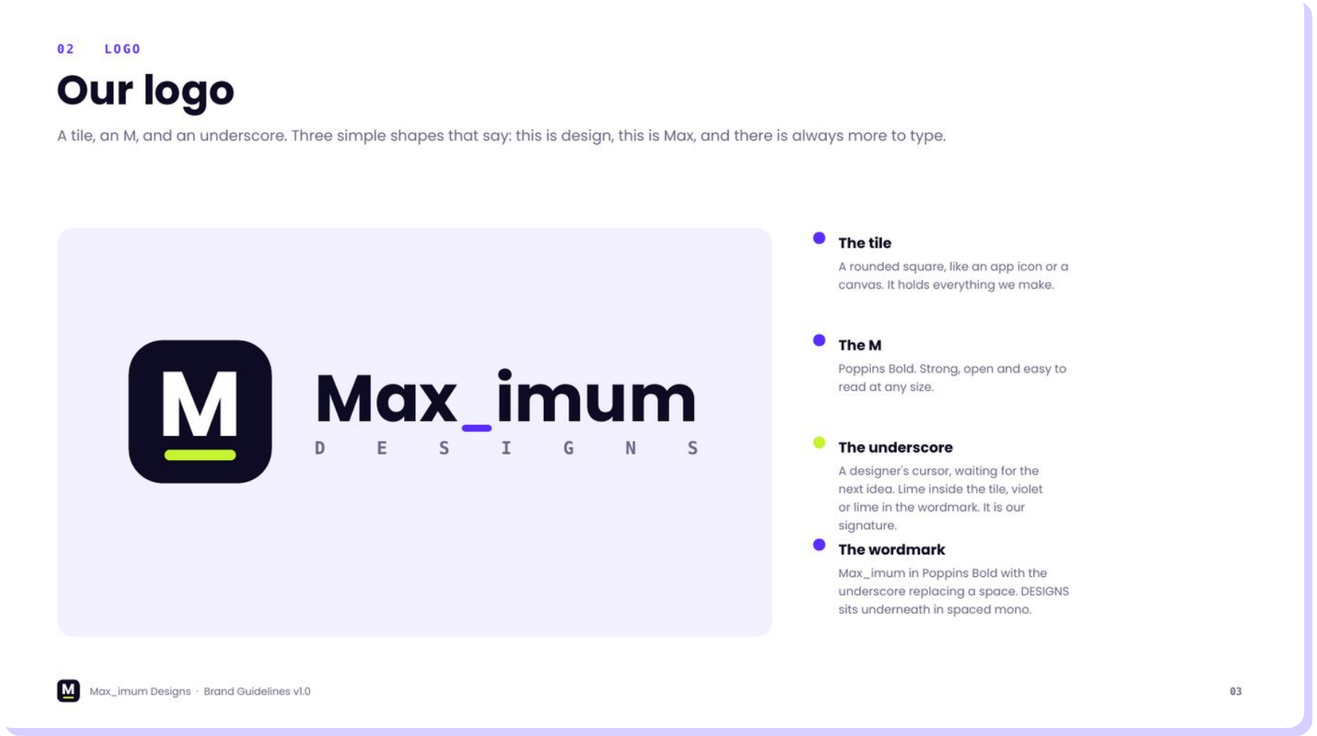

A young studio had to look established and credible on a small budget, and stand out from template-based designers.

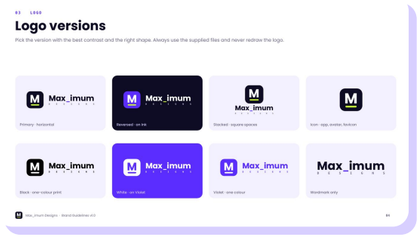

OUR APPROACH

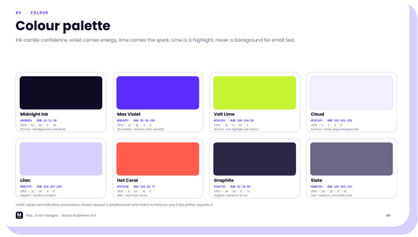

The underscore from the name became the signature device: in the logo, between words and at the foot of every layout. Midnight Ink, Max Violet and Volt Lime give a confident palette that looks different from typical service brands.

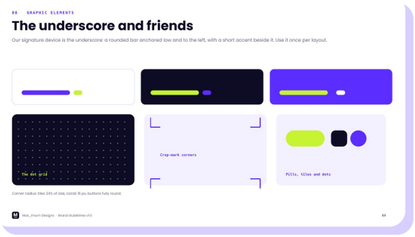

DELIVERABLES

- Logo in 4 layouts and 5 colourways (60 files: PNG, SVG, PDF)
- App icon, favicons and Android adaptive icon
- 13-page brand guidelines
- Layered PSD files

COMPLETED

OWN BRAND · OCTOBER 2026

Max_imum stationery suite

Sixteen print-ready items that make a small studio look established.

THE CHALLENGE

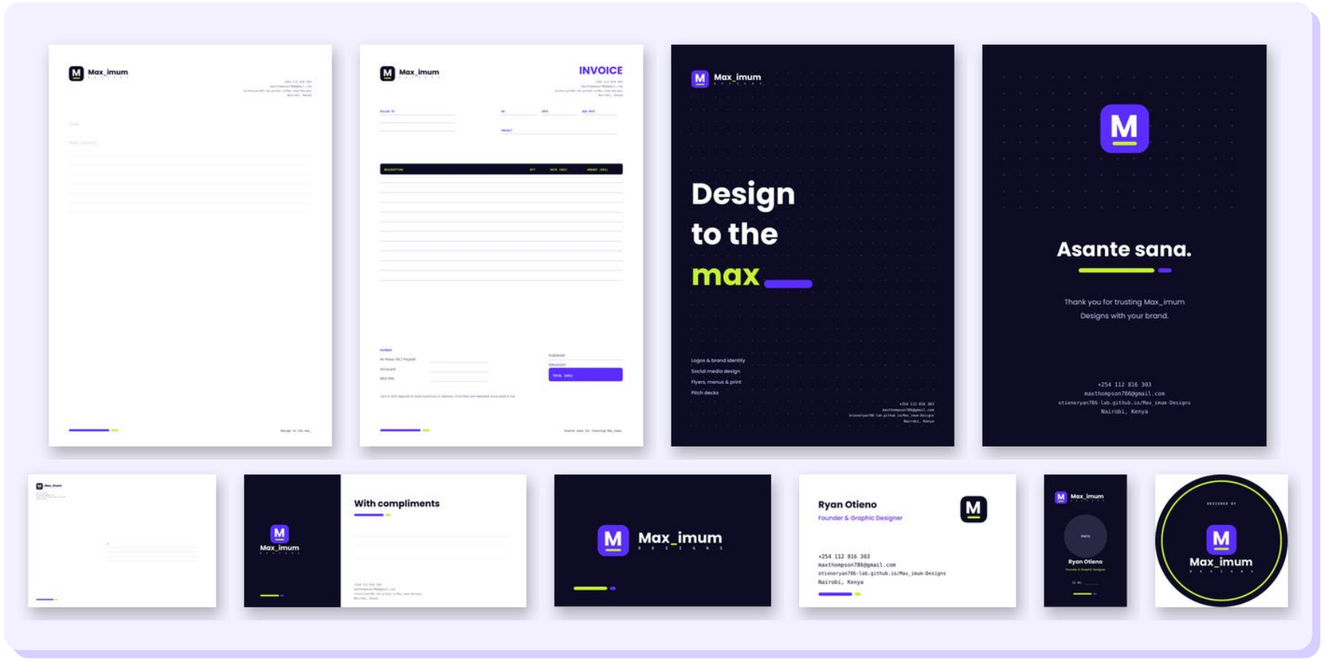

Quotes, invoices and envelopes are often the first printed thing a client touches.

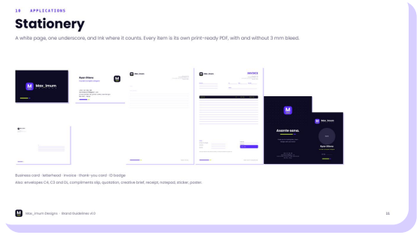

OUR APPROACH

A white page, one underscore and Ink where it counts. Every item exists with and without 3 mm bleed, with guides and layered PSDs.

DELIVERABLES

- Business card, letterhead, C4, C3 and DL envelopes
- Invoice, quotation, creative brief and receipt
- Compliments slip, notepad, thank-you card, ID badge
- Round sticker, counter poster and a 10-up card sheet

COMPLETED

OWN BRAND · OCTOBER 2026

Max_imum social media kit

One bold system for profile pictures, banners and posts.

THE CHALLENGE

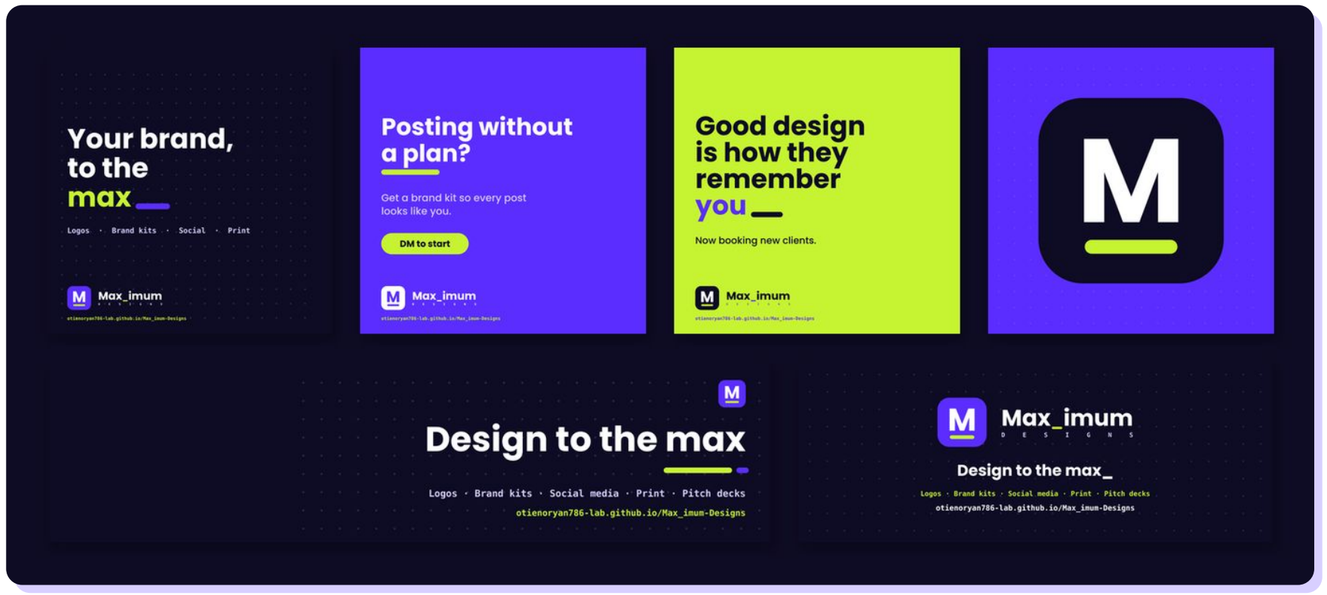

Social media posts look different every time when there is no system.

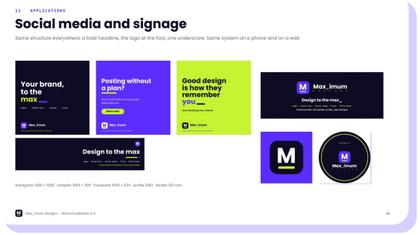

OUR APPROACH

Large headlines, the logo at the foot and one underscore, so the same layout works on a phone and on a wall.

DELIVERABLES

- Profile picture
- LinkedIn banner and Facebook cover
- 3 Instagram post templates
- Clickable email signature

COMPLETED CONCEPT PROJECT · OCTOBER 2026

DukaPay brand system

A complete identity for a stock-tracking and micro-credit idea for Kenyan dukas.

THE CHALLENGE

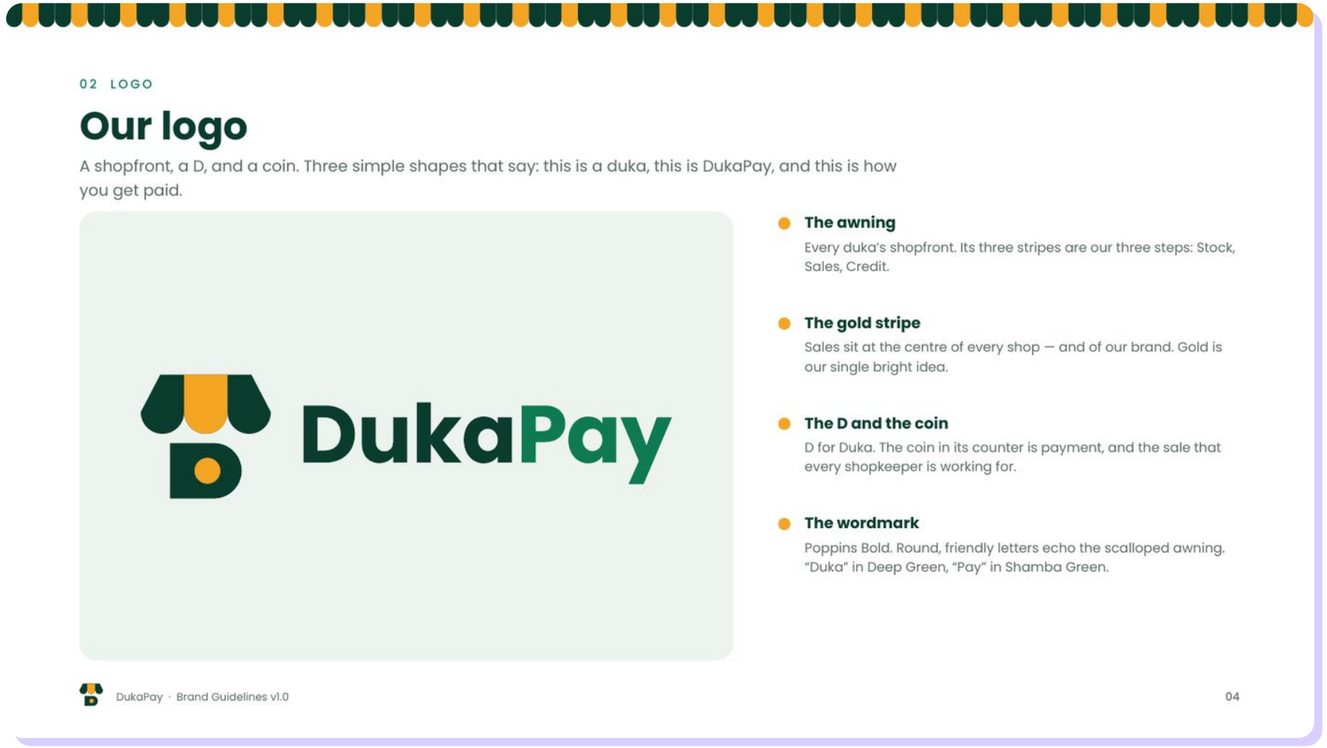

A finance idea for small shop owners has to feel trustworthy and friendly, on a phone and on a shop window.

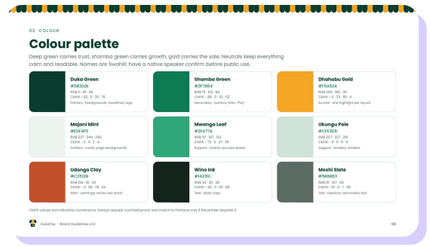

OUR APPROACH

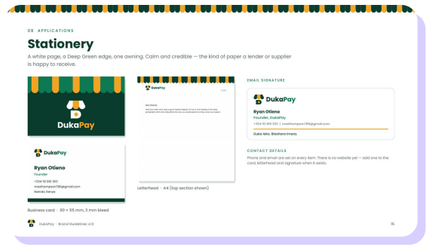

The logo joins a shopfront awning, a D for duka and a coin. Deep green carries trust, gold carries sales, and a scalloped awning edge became the signature across stationery, posts and signage.

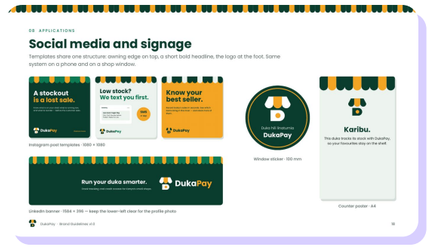

DELIVERABLES

- Logo family and colourways
- 19-page brand guidelines
- 16 print-ready stationery items
- Instagram and LinkedIn templates, window sticker, counter poster

COMPLETED

OWN BRAND · OCTOBER 2026

Pitch deck with speaker notes

Twelve clear slides that explain the problem, the offer, the team and the plan.

THE CHALLENGE

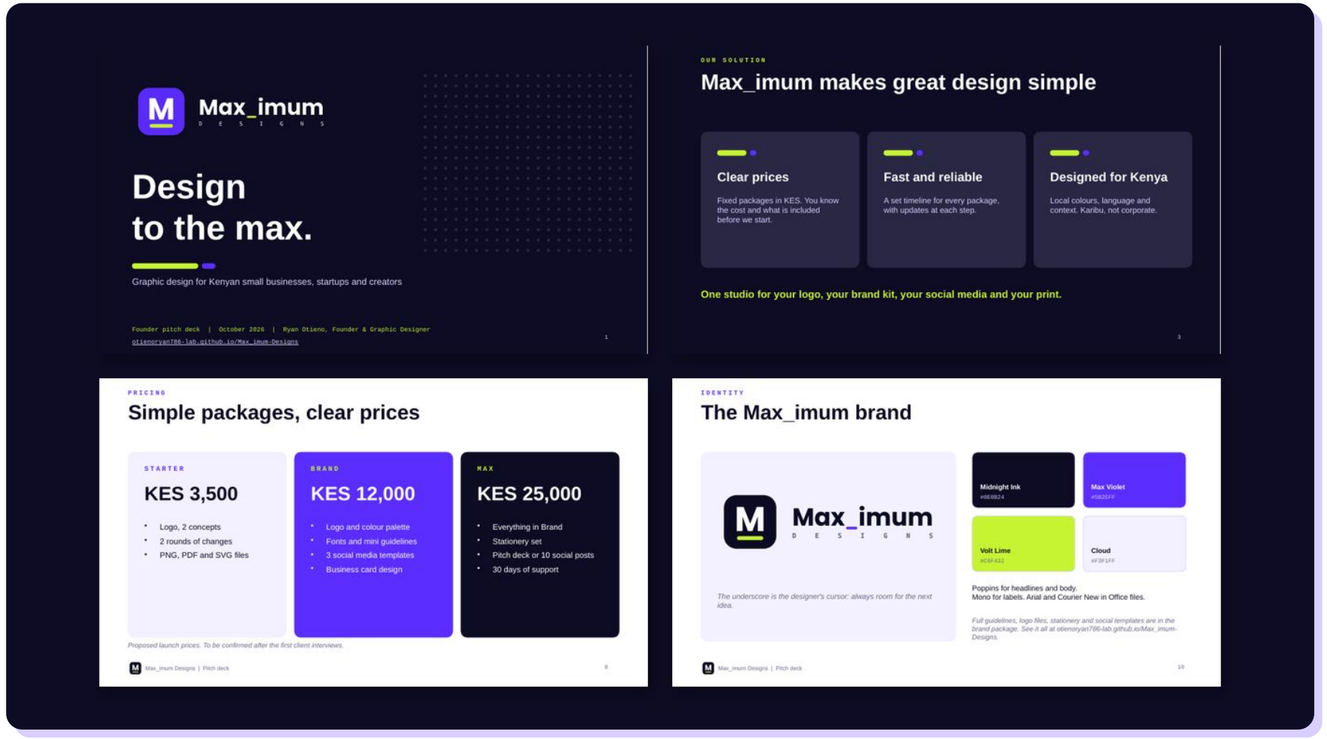

A founder needs a deck that is easy to present and easy to trust.

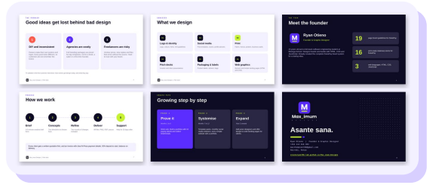

OUR APPROACH

One idea per slide, big type, the brand palette and full speaker notes so the story is easy to tell.

DELIVERABLES

- 12-slide PowerPoint
- Speaker notes on every slide
- Editable text and shapes

COMPLETED OWN BRAND · OCTOBER 2026

Company profile

A six-page company profile, as a designed PDF and an editable Word file.

THE CHALLENGE

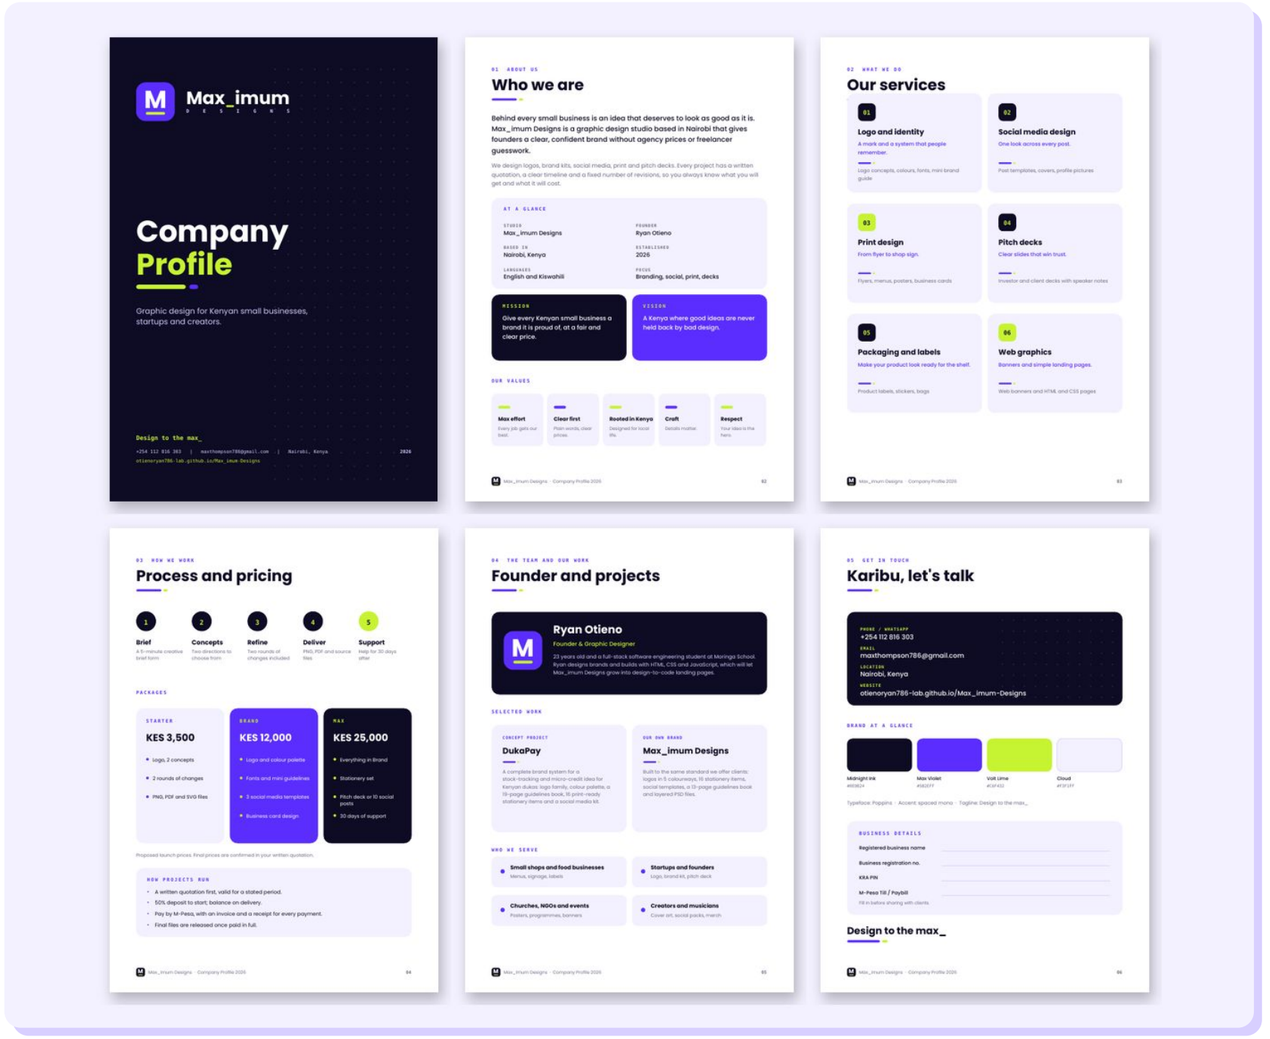

Clients and partners want to know who you are and how you work in one document.

OUR APPROACH

A cover, who we are, services, process and pricing, founder and projects, and contact, all in the brand system. The Word version uses real tables and styles so details are easy to update.

DELIVERABLES

- 6-page PDF
- Editable Word version
- Fill-in business details table

COMPLETED

OWN BRAND · OCTOBER 2026

Rate card 2026/27

A two-page price list built from a review of Kenyan market prices.

THE CHALLENGE

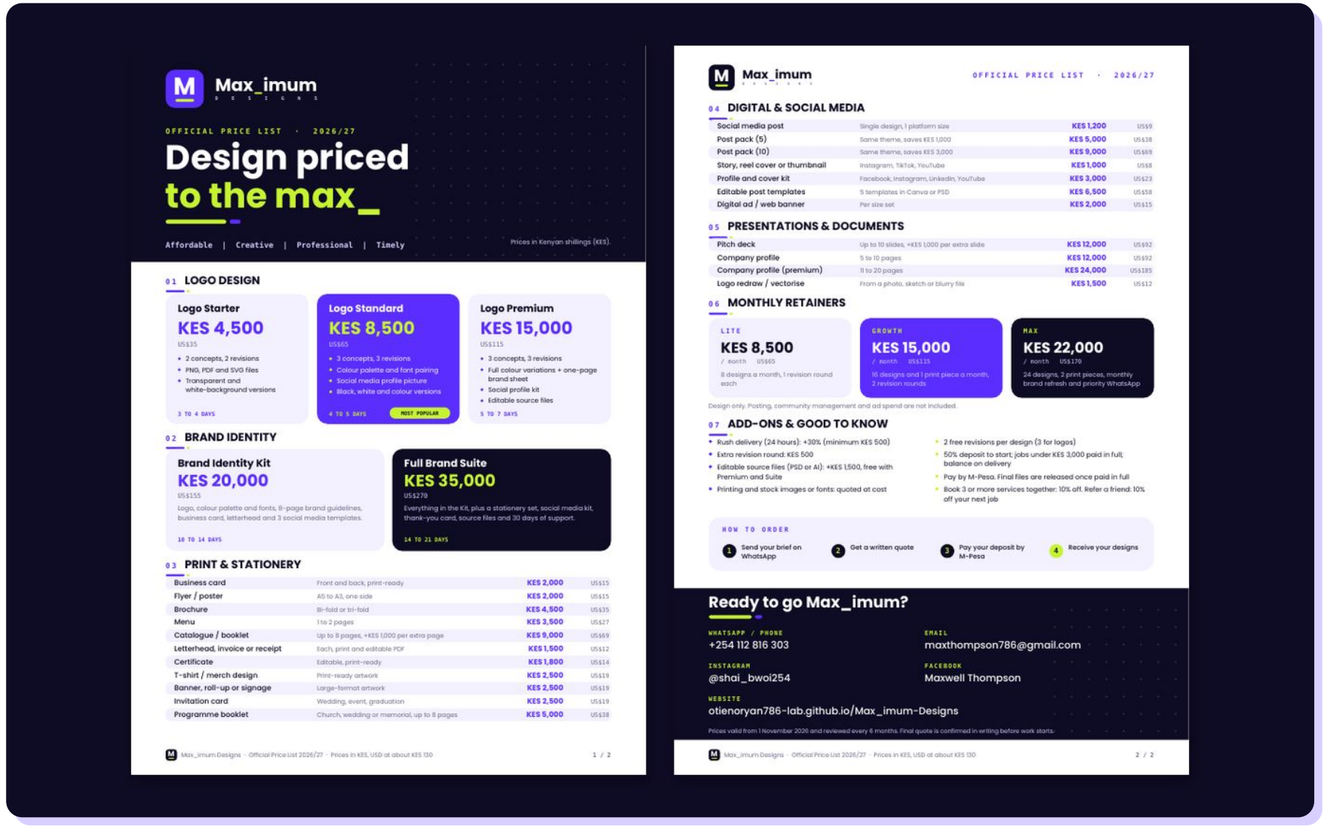

An old rate card undersold the work and had no clear terms.

OUR APPROACH

Prices were checked against what Kenyan designers and studios charge, then grouped into clear packages with revisions, deposits and delivery times.

DELIVERABLES

- 2-page PDF and PNG pages for WhatsApp
- Layered PSD files
- Dollar equivalents and clear terms

COMPLETED

OWN BRAND · OCTOBER 2026

Brand Health Check

A three-page score sheet that helps small businesses see what to fix first.

THE CHALLENGE

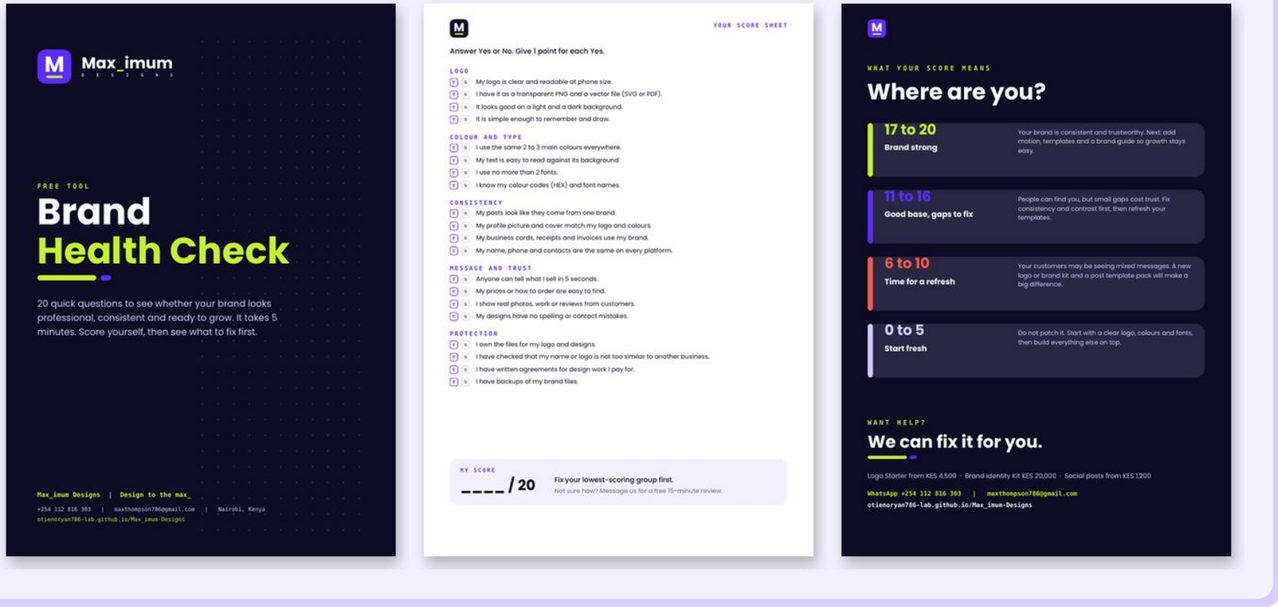

Prospects need a simple, free way to see why their brand needs help.

OUR APPROACH

Twenty yes or no questions in five groups, with score bands that lead to a clear next step.

DELIVERABLES

- 3-page PDF lead magnet
- 20-point checklist and score bands

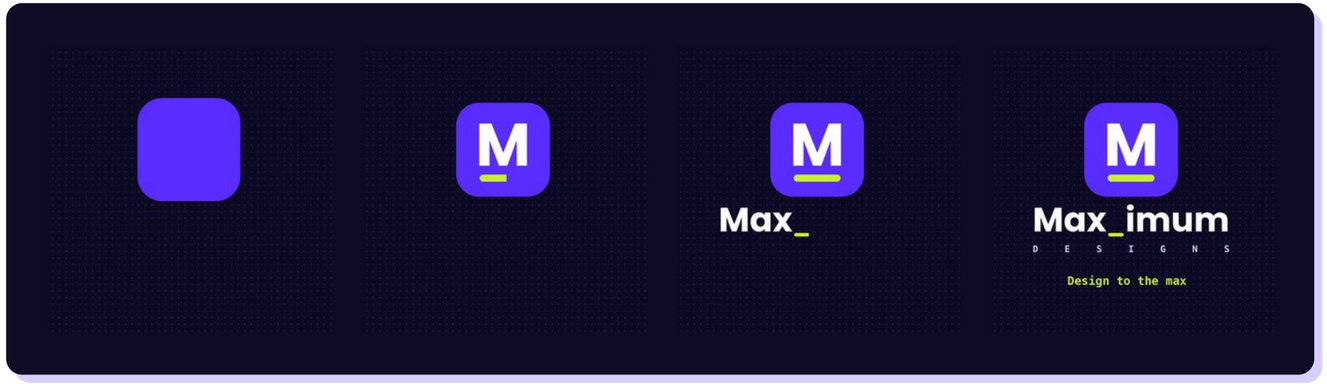

COMPLETED

OWN BRAND · OCTOBER 2026

Animated logo

A 4-second logo reveal in three shapes, ready for reels, videos and presentations.

THE CHALLENGE

Short video is where customers spend their time, and a still logo gets lost.

OUR APPROACH

The tile pops in, the M slides up, the underscore draws and the wordmark types in, ending on the tagline with a blinking cursor.

DELIVERABLES

- MP4 in landscape, square and vertical
- Square GIF for email
- Final-frame stills

COMPLETED OWN BRAND · OCTOBER 2026

Social template packs

Ten editable templates for two niches: food and retail, and churches and events.

THE CHALLENGE

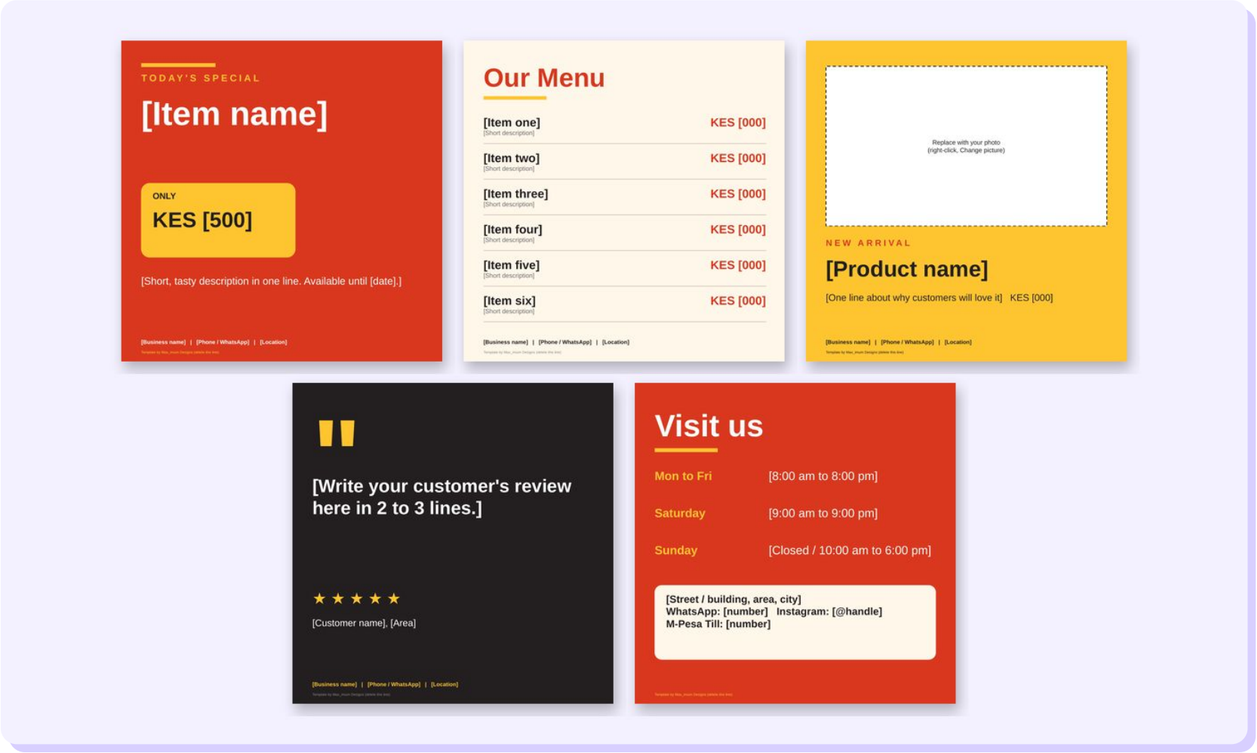

Small businesses need posts they can edit themselves without a designer each time.

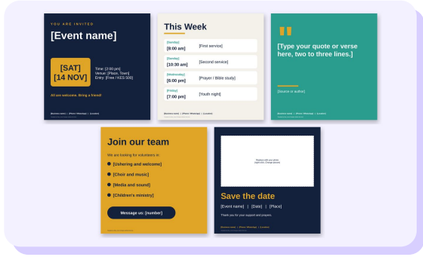

OUR APPROACH

Large readable type, placeholders and photo boxes, built in PowerPoint so they edit in PowerPoint, Google Slides or Canva.

DELIVERABLES

- 2 packs, 5 templates each (1080 x 1080)
- Live editable text
- PNG previews and a how-to

COMPLETED

OWN BRAND · OCTOBER 2026

Studio website

A fast, responsive website with prices, work, a quote form and policy pages, coded by hand.

THE CHALLENGE

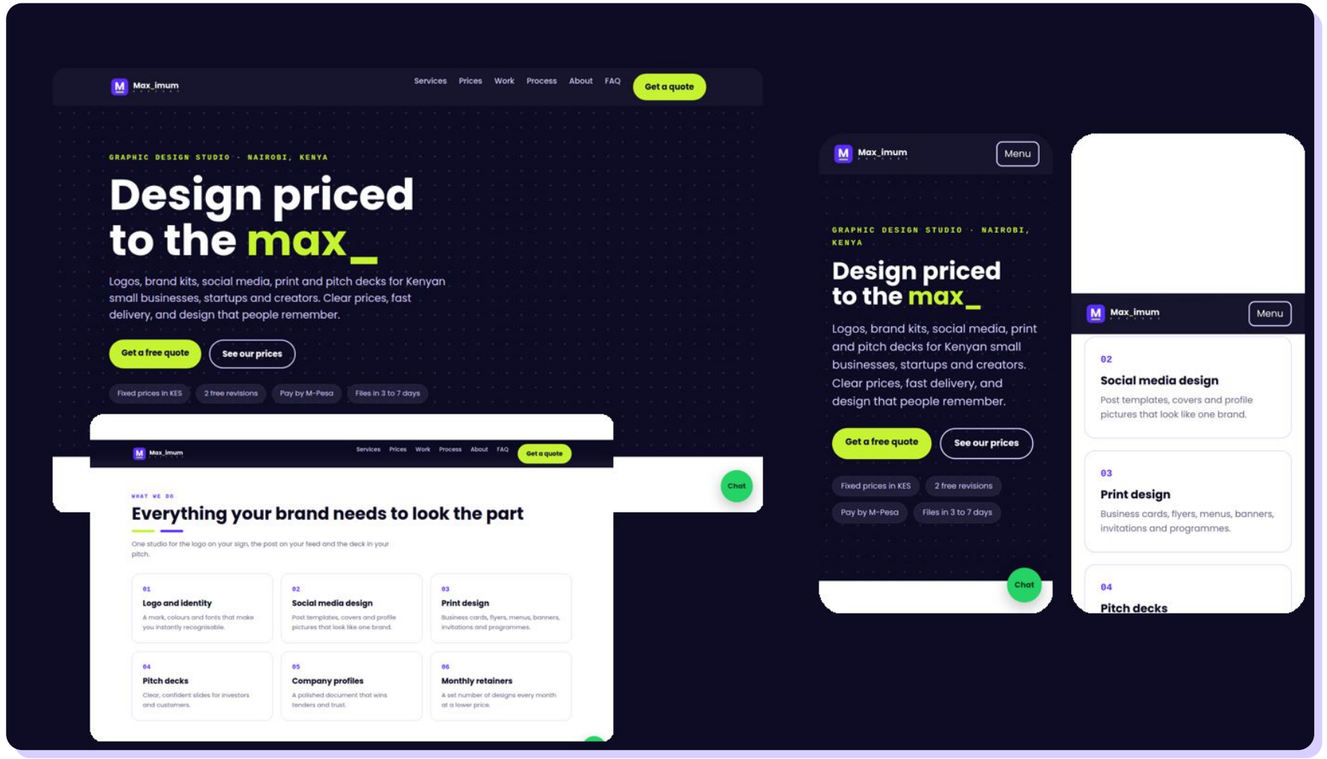

A small studio needs a home online that works on every phone and is easy to update.

OUR APPROACH

HTML, CSS and JavaScript only. Prices and business details live in one file each, the quote form opens WhatsApp or email, and the policy pages follow the Data Protection Act.

DELIVERABLES

- Responsive HTML, CSS and JavaScript site
- Price list and quote form driven by one data file
- Privacy, terms and AI policy pages

What is next

IN PROGRESS Nov 2026 to Jan 2027

Launch and win the first 3 paying clients

Launch offer for the first clients, WhatsApp Business set-up, weekly content, and the Brand Health Check sent to local businesses.

IN PROGRESS Nov 2026 to Jan 2027

Publish real client case studies

Turn the first finished projects into three case studies, with the client's permission and, where shared, real results.

PLANNED Nov to Dec 2026

Flyer, menu and print redesign concepts

Redesign three local flyers and menus as concept projects to show print skill and bleed-ready files.

PLANNED Jan to Feb 2027

Animated logos and reel templates

Animate three client logos and build five reel templates.

PLANNED Mar to Apr 2027

Mobile-first landing page designs

Design a landing page for a local business in Figma, with components and auto layout.

PLANNED May to Jun 2027

Two coded landing pages

Build and publish two landing pages with HTML, CSS and JavaScript on GitHub Pages: design and code in one service.

PLANNED Jul to Aug 2027

Mini brand strategy case study

Research, positioning, naming and tone of voice for one client, as a short strategy document.

PLANNED Sep to Oct 2027

Packaging and label design

Design a label and box for a local product, with mock-ups and print-ready files.

Let us make the next one

OUR GOALS

- 3 paying clients and 3 case studies by January 2027
- 10 paying clients by April 2027
- New project added to this portfolio every month
